

Testimony for Raised Bill HB5285

March 3, 2022,

Roger Kuhns, Mystic, CT

This testimony is in support of #5285 that it be required that all school districts provide climate change instruction as part of the science curriculum.

I request that the bill be amended to include within career education subjects of job and career opportunities in the areas of climate change science, sustainable live-styles, environmental science, clean energy systems, resilient low-energy consumption buildings, zero-carbon transportation, and related business sectors.
